Safety Data Sheets for Pfleiderer products

Ladies and Gentlemen,

The requirement for a Safety Data Sheet is regulated in REACH-V (EC) No 1907/2006 in accordance with Article 31, which stipulates that a safety data sheet in the form specified in Annex II shall be prepared if

- a substance/mixture/product is to be classified as dangerous within the meaning of the Regulation(EC) No 1272/2008
- or
- persistent, bioaccumulative and toxic or very persistent and very is bioaccumulative in accordance with Annex XIII

This does not apply to Pfleiderer products without exception.

For this reason, we have decided not to prepare Safety Data Sheets for our products in order not to unsettle our customers with regard to any potential hazards. Nevertheless, we do of course provide all important information on our products in the form of Product Information or Technical Data Sheets.

Yours faithfully

PFLEIDERER Deutschland GmbH
ppa.
